Enterprise Data Governance and Standards Document Preface

Data Integrity Guidelines

Purpose

These guidelines define the responsibilities of everyone accessing and managing enterprise operational data. Offices may have individual guidelines that supplement, but do not supplant or contradict, this statement. Data entrusted to the institution by other organizations (e.g., foundations and governmental agencies) is governed by terms and conditions agreed upon with those organizations. Specific issues not governed by such agreed terms shall be governed by the guidelines set forth in this document. These guidelines were developed to ensure database integrity, regulatory compliance, and security controls, and to achieve the institutional goals of efficient, professional, and cost-effective communication to support the mission of the University of Louisiana at Lafayette. These goals for data integrity include:

- avoiding creation of duplicate records for a single entity;
- providing complete General Person information in a timely manner, with an audit trail of changes;
- using standard entry to facilitate consistent reporting and searches;
- sharing effective processing discoveries and problem-resolution scenarios; and
- taking advantage of the database capabilities and functionality.

Scope of this Document

This document defines the standards for maintaining the integrity of the University of Louisiana at Lafayette information. It covers the format and usage of data elements that are shared between systems and those that are common to enterprise operational systems and generally referred to as the General Person data. This document is written specifically for those individuals that have update capability and therefore can seriously affect the integrity of the information and associated business processes. This information will also be helpful for those with inquiry access to the information to further understand the reason for certain formats of information.

Definitions

Banner: Banner is an enterprise resource planning software system owned by Ellucian and includes the following systems: financial aid; finance; student; human resource/payroll; document management; enrollment management; advising; advancement; workflow; degree audit; and data warehousing.

Data Custodians (or Data Administrators): Data Custodians, also known as Data Administrators, are the technical guardians of an organization's data assets. They are responsible for the safekeeping, transport, and storage of data, ensuring that it is managed in a secure, efficient, and compliant manner. Data Custodians implement the policies and procedures established by Data Trustees and Data Stewards, focusing on the technical aspects of data

management including database administration, data storage solutions, data security measures, backup and recovery plans, and the maintenance of data integrity. They work closely with IT security teams to apply appropriate security controls, monitor data access, and prevent unauthorized data modification, disclosure, or destruction. Data Custodians ensure that the organization's data infrastructure and practices support the overarching goals of data governance, data quality, and data privacy, serving as the operational backbone of the data governance framework.

Data Domain: In the context of data governance, a Data Domain refers to a specific area or category of data that is managed as a coherent unit, often based on its subject matter, usage, or relevance to a particular business function or organizational department. Data Domains are typically defined to organize data management practices around similar types of data, such as financial data, student records, human resources data, or research data in a university setting. Each Data Domain has associated policies, standards, and practices to ensure data within it is accurately collected, maintained, protected, and utilized. This organization facilitates effective data governance by assigning clear responsibilities and roles (e.g., Data Stewards) for different types of data and ensuring that data management practices are tailored to the specific needs and requirements of each domain.

Data Steward: Data Stewards are typically responsible for the operational management and quality of data within their domain. They ensure that data governance policies and procedures are implemented and adhered to, data quality is maintained, and data is used appropriately in alignment with organizational goals and compliance requirements. This role focuses on the day-to-day management of data, including its accuracy, privacy, and security.

Data Trustee: refers to senior-level individuals who have overarching responsibility for data governance and policy-making within an organization. These roles are crucial for setting data governance frameworks, policies, and strategies that guide how data is managed, protected, and used across the organization.

Data Users: Data Users are individuals or entities within an organization who access, utilize, or analyze data as part of their operational, analytical, or decision-making processes. They rely on data to perform their job functions, which may include research, analysis, reporting, decision support, and other activities that require data interaction. Data Users must adhere to data governance policies, privacy standards, and security protocols established by the organization to ensure the responsible and ethical use of data. They operate within the permissions and access rights granted to them, based on their role and the data's sensitivity and classification. The effectiveness and compliance of Data Users in handling data directly impact the organization's data quality, integrity, and trustworthiness.

Enterprise Operational Systems: This includes software systems and associated hardware infrastructure that support operation data management systems and the related information resource infrastructure to support institutional goals.

General Person: General Person is a Banner term that relates to all person or person-like entities, including students, faculty, staff, alumni, vendors, companies, and corporations. Any

person in the system can ultimately be tied back to the main general person tables (i.e., SPRIDEN, SPBPERS, SPRADDR, SPRTELE, SPREMRG, GOREMAL) via a PIDM.

Patch/Upgrade Management: The process of controlling modifications to hardware, software, firmware, and documentation to ensure that the enterprise operational systems are protected against improper modification before, during, and after system implementation.

PIDM: The term PIDM (Person Identification Master) is related specifically to Banner and how different data tables are tied together in the database. A PIDM is simply a unique numeric system identifier that is not normally visible to users of the system. Every entity associated with the university---whether student, employee, vendor, prospect, alum, or friend has a PIDM associated with General Person data. The PIDM is used in all tables associated with a person or other entity; this allows us to change demographic information for a person-including SSN-without affecting the underlying database table connections.

Security Roles: Security roles are established by the Data Steward based on business process, job function, and institutional goals- Specific capabilities will be assigned to each security role. For example, the registration clerk would have update access to registration, but only inquiry to student accounts. Each user will be assigned a role or several roles depending on their particular needs as established by their division/department head or his/her designee and as approved by the Data Owner(s). Security roles and their functions are included in the relevant policies.

Third Party Software Systems: Third party products include any vendor delivered software system or in house developed programs with interfaces or shared data elements to Banner. These include but are not limited to cashiering systems; catalog and course systems; curriculum and program management; employee applicant, job description and performance evaluation systems, faculty activity tracking; forms management; job scheduling; parking system; residential living management; schedule management; and reporting tools.

Data Governance and Confidentiality Compliance

Confidential Data Management Under federal and state laws, as well as University of Louisiana at Lafayette policies, specific data classifications are deemed confidential and are strictly regulated regarding their release, storage, retention, usage, maintenance, and destruction. It is imperative that all users strictly adhere to these legal requirements and institutional policies to ensure the secure and compliant handling of confidential data.

For detailed information on the Information Technology Responsible Use Policy, please visit [University IT Policies](#).

Data Governance Framework: Roles and Responsibilities at the University

Data Governance at the University encompasses a structured framework designed to ensure that data assets are managed effectively, securely, and in alignment with the institution's mission and compliance obligations. This framework assigns clear roles and responsibilities to various members of the University community, facilitating the proper handling, security, and utilization

of data across all operational systems on campus. Through a collaborative effort among Data Trustees, Data Stewards, Data Custodians, and Data Users, the University aims to uphold the integrity, confidentiality, and availability of its data. This comprehensive approach ensures that data is leveraged ethically and responsibly, supporting the University's educational, research, and administrative objectives while adhering to relevant policies, standards, and regulations.

- **Data Trustees:**
 - **Formulating Security Policies and Procedures:** Data Trustees are tasked with the strategic formulation of information security policies and procedures, ensuring alignment with the University's overarching standards and compliance with legal and regulatory frameworks. Their role is to define the governance landscape within which data is managed securely and responsibly.
 - **Delegating Access Management:** While Data Trustees establish the principles and policies for data access, the operational responsibility for managing access rights is delegated to Data Stewards, and Data Custodians. This delegation ensures that access to data is managed on a more granular level, allowing for precise control and oversight in line with specific data governance needs and organizational roles.

- **Data Stewards:**
 - **User Training and Awareness:** They ensure users are trained and aware of data security practices, promoting a secure data environment.
 - **Incident Handling and Reporting:** They report and respond to data security incidents, coordinating with Data Trustees and security officers to mitigate risks.
 - **Managing Authorizations and Access:** They manage day-to-day access authorizations, ensuring users have access necessary for their roles.

- **Data Custodians:**
 - **Technical Data Management:** Data Custodians manage the technical environments where data is stored, processed, and secured. They implement the security measures and manage data access mechanisms.
 - **Data Maintenance and Backup:** They are responsible for routine data maintenance tasks, including backups, to ensure data resilience and recovery capabilities.

- **Data Users:**
 - **Adhering to Data Policies:** Data Users access and use data within the parameters set by Data Stewards and according to university policies. They are responsible for handling data ethically and securely.
 - **Participating in Training and Awareness Programs:** They actively participate in training programs to understand their responsibilities in maintaining data security and integrity.

Data Standards

The University of Louisiana at Lafayette utilizes the Banner integrated database. UL Lafayette recognizes that data standards are vitally important in protecting the data assets of the University by maintaining accurate and consistent data that is standardized for use in all areas of the University.

The Data Content Committee (DCC) shall consist of Data Stewards and other key stakeholders. The DCC was formed to collaboratively develop the Enterprise Data Governance and Standards Manual. This manual is a standards policy reference guide. Recommended changes to the manual should be submitted to the DCC for review. Should a Change Request require escalation, the DCC chair will identify the respective Data Steward and Data Trustee responsible for the data in question to meet, discuss, and render a decision on the matter.

Purpose

The purpose of this document is to establish guidelines for:

- Stewardship of the University’s data and records maintained in the Enterprise Systems and Data Stores
- Ensuring data integrity and consistency
- Roles and duties for ensuring responsible use
- Hierarchy of managers responsible for systems and processes

1. Identification

1.A. Current Identification

1.A.1. General

In all cases, the full legal name should be recorded as the current name. The official forms of all data collection instruments used by the university should encourage the use of the full legal name, that is, first, middle and last names written in full. For all employees and recipients of financial aid, this must be the name as it appears on the individual’s Social Security card. Given that persons have maintained the appropriate updates with other agencies, the legal person name and the social security card name should be the same. Mandatory federal reporting to the Department of Education, the Internal Revenue Service, and other federal and state agencies require that persons provide their social security number and social security card name.

Legal Name

The legal name field is the SPRIDEN record and should only be populated when the separate first, middle, or last name field is too short to store the complete name. In these cases only, enter the complete name in this field in first-middle-last name format. Note that this field is not used by any system processes.

The data in this field merely provides a place in the system to store the full name for someone whose name will not fit completely in the standard name fields. When you perform a name change for an individual whose full name is stored in the Legal Name field, you must also update the Legal Name field. If the new name fits in the standard fields, remove the information in the Legal Name field. Note: In Banner, the Legal Name field is a single, free-format field that is not automatically updated if the person officially changes his/her name. You cannot use the Legal Name field as the basis for database searches.

Last Name

All information is to be entered using mixed case (standard combination of upper and lower case letters). Enter the legal spelling and format of the last name as supplied by the person.

Hyphens may be used to separate double last names (sometimes used in ethnic names or by persons who wish to utilize their maiden and married names). In general, if there are two last names that are not hyphenated (e.g. Monica Lou Creton Quinton), Monica would be input as the first name, Lou would be input as the middle name and Creton Quinton would be input as the last name with a space between the two names.

Spaces are permitted if the legal spelling and format of the name includes spaces. Examples: Mc Donald, Mac Phearson, St John, Del la Rosa, Van der Linder.

No spaces should appear before or after hyphens or apostrophes.

Do NOT use titles, prefixes, and suffixes in the last name.

No symbols may be used unless included on legal documentation. Legal documentation required includes updated Social Security Card, Driver's License (for proof of ID), and a copy of legal document that prompted the name change (for example: marriage certificate, divorce decree, etc.).

First Name

All information is to be entered using mixed case (standard combination of upper and lower case letters). Enter the legal spelling and format of the first name as supplied by the person.

If no first name exists, put a period in this field.

Never enter nicknames as a first name; there are specific fields where a preferred first name should be entered. Any single character first name should be entered as it appears on legal documentation. In those cases where a single character first name is designated as the first name and followed by a middle name, place the single character in the first name field and the middle name in the middle name field.

No symbols may be used unless included on legal documentation. Hyphens MAY be used to separate double first names as it appears on legal documentation. Legal documentation required includes updated Social Security Card, Driver's License (for proof of ID), and a copy of legal document that prompted the name change (for example: marriage certificate, divorce decree, etc.).

Spaces are permitted if the legal spelling and format of the name includes spaces (e.g. Mary Ann, Bobby Joe).

Do NOT use titles, prefixes, or suffixes in the first name field.

Middle Name

All information is to be entered using mixed case (standard combination of upper and lower case letters). Enter the full legal middle name or, if not available, the middle initial as supplied by the person. If no middle name exists, leave the field blank.

No symbols may be used unless included on legal documentation. Legal documentation required includes updated Social Security Card, Driver's License (for proof of ID), and a copy of legal document that prompted the name change (for example: marriage certificate, divorce decree, etc.).

Spaces are permitted if the legal spelling and format of the name includes spaces.

Do NOT use titles, prefixes, or suffixes in the middle name field.

Preferred First Name (Optional) SPAPERS

Use the preferred first name field when the person is called by something other than their given first name. For example, enter Jim for James or Chris for Christine if such a name were preferred. Likewise, enter the middle name if this is preferred over the first name. Other examples would be "Skip", "Trey", or "Junior".

In order to make the preferred first name searchable, it should be entered on the Alternate ID tab using the PEF name type.

All information is to be entered using mixed case (standard combination of upper and lower case letters). Enter the legal spelling and format of the preferred first name as supplied to you by the person. If no preferred name is given, leave the field blank.

The preferred name is being collected on the undergraduate application by Undergraduate Admissions. Human Resources updates preferred name for employees.

1.A.1.a. The following chart summarizes policies and procedures for making name changes for person and non-person entities in Banner.

Office	Type of Entity
Recruitment and Admissions	Prospective and Admitted Students; non-person for new college/high schools
Graduate School	Prospective, Admitted, and Current Students; Non-person for college information
Registrar’s Office	Students
Continuing Education	Student (non-matriculating)
Financial Services/Accounts Receivable	Third Party, non-person
Purchasing/Administrative Services	Vendor (Non-Person), person
Human Resources	Applicants and Employees
Financial Aid	Financial Aid Prospect, Financial Aid non-person
Student Affairs	Non-student; not enrolled put hold on account
Advancement	Donors, individuals, and non-person

Informed professional judgment must be used to determine what constitutes a name correction rather than a name change.

Deceased Information (SPAPERS)

The deceased flag (spbpers_dead_ind) and date (spbpers_dead_date) is entered on SPAPERS. This field is edited by the Registrar’s Office, Human Resources, and Advancement.

1.A.2. Name Types (GTVNTYP)

Current names should not be associated with a name type and is your official name in Banner, unless the record is a “DO NOT USE” duplicate record. Previous or alternate names should be associated with the appropriate name type.

Abbreviation	Description
ADFN	Advancement Full Name
AKA	Name constituent is still known as but not the preferred/former name
APID	Alternate SSN (A00/A01 SSN from ISIS)
BRTH	Birth Name
DBA	Doing business as
DUPE	Dupefinder Duplicate
FAVD	Ethos favored name type
FMR	Former Name
GRFM	Graduate Faculty Manuscript
ISVN	ISIS Vendor ID
LEO	Louisiana Employees Online Personnel Number
LGCY	Legacy CLID from conversion
MILL	Millennium Legacy ID
MULT	Multiple IDs in ISIS
PREF	Preferred
PREV	Previous Name
THRD	Third Party Accounts Receivable Vendor

Additional ID Type [GTVADID]

Additional ID Type	Description
AIE	Academy of Interactive Entertainment
APID	Alternate PID for International Students

1.A.2.b Prefixes and Suffixes

Prefix

The default for this field is blank. Enter a prefix only if requested or provided. Prefixes are to be entered using mixed case (standard combination of upper and lower case letters) as an abbreviation. Enter the prefix in the prefix field, not in the first, middle, or last name fields. Below are examples of the more commonly used prefixes and recommended abbreviations.

Abbreviation	Description
Mr.	Mister
Mrs.	Madam/Missus
Ms.	Ms
Miss	Miss
Dr.	Doctor
Hon.	Honorable
Rev.	Reverend
Sr.	Sister
Fr.	Priest/Father
Bro.	Brother

Consult Appendix 1 for a more extensive guide to prefixes, suffixes and salutations.

Suffix

The default for this field is blank. Enter values only if requested or provided. All suffixes are to be entered using mixed case (standard combination of upper and lower case letters) as an abbreviation. Enter the suffix in the suffix field, not in the last name field. Below are examples of commonly used suffixes and recommended abbreviations. The suffix field is not included on printed payroll checks and tax reports.

Abbreviation	Description
Sr.	Senior
Jr.	Junior
II	The Second
III	The Third
PhD	Doctor of Philosophy

Consult Appendix 1 for a more extensive guide to prefixes, suffixes and salutations.

1.A.3. Non-Person Name/Vendor

All information is to be entered using mixed case (standard combination of upper and lower case letters). Acronyms are an exception. See the acronym section below. Enter the non-person's name as supplied to you. If possible, the name should be that obtained from the non-person's W9 or associated with the Tax ID number.

Hyphens may be used to separate double names.

Spaces are permitted if the legal spelling and format of the name includes spaces. Spaces should be used if the name of the company is derived from the initials of a person's name. For example, use A G Edwards not AG Edwards.

No symbols may be used unless included on legal documentation. Legal documentation required includes IRS Form W9. The ampersand (&) can be used only when part of a formal name (e.g., Baltimore & Ohio Railroad). Use 'and' in all other cases.

Abbreviations are allowed for Co, Corp, Ltd or Inc when used after the name of a corporate entity. All other forms of abbreviations should not be used for the corporate entity name.

Acronyms – Companies that are recognized by their acronyms should be entered using their acronym (e.g., IBM, SCT, and ITT) with no spaces between characters.

1.B. Entity Exception

1.B.1. Non-Student Entity

To request a new non-student entity, a Help Desk access request should be submitted to Data Standards for review. Once approved by Data Standards, IT will define the entities (and any new entities) in the GTVADID Validation Form. The owners will be trained by the Registrar's Office on how to maintain the individual person records in the GORADID Table Additional Information Tab in SPAIDEN.

Code	Owner	Entity
UPBD	University College	Upward bound
VUPD	University College	Veterans Upward Bound
IEP	OIA	Intensive English Program

1.B.2. Non-Employee Entity

The Human Resources Team will define entities that are not employees in the PTRSKIL form on Banner and will be responsible for maintaining the information on non-

employees. Human Resources will notify the Data Standards Committee of any updates/changes to PTRSKIL.

Code	Entity	Description
ADJCSD	Adjunct Cornerstone onDemand	Flag for Adjunct employees who need CSOD access. Not for NP Process*
NONDEG	Non-Degree Seeking Students	Intensive English Program, Visiting Scholars
NPACSD	Non-Paid Affiliate Cornerstone	
NPAFFL	Non-Paid Affiliate	Third Party Vendors, Credit Union, Foundation Employees
PHFACU	Pending Hire – Faculty	Pending faculty hire, waiting for formalized approval of PAF
PHSTAF	Pending Hire – Staff	Pending staff hire, waiting for formalized approval of PAF
RESAFF	Research Affiliate	Researchers collaborating with UL employees, but not paid
STUCSD	Student Cornerstone onDemand	Flag for Student employees who need CSOD access. Not for NP Process*
TEMPPT	Temporary Part-time	Sporadically employed/limited duration appointments
TPTCSD	Temp PT Cornerstone onDemand	Flag for Temp PT employees who need CSOD access. Not for NP Process*

2. Address Information

2.A. General

The Mailing Address must be populated when a non-person is added to the system. Multiple addresses can be entered using different address types. Follow any additional procedures established by your department for address entries. Address standards have been established cooperatively so that address types are used consistently. Department specific standards should be recorded with the Data Standards committee. Use the appropriate address type code from STVATYP.

International students must have street addresses rather than Post Office boxes.

Clean Address (3rd party system) will verify an entered US address as a valid postal address and will correct to standard USPS guidelines. This correction should be accepted in all cases but for rare exceptions, such as a newly built house not yet in the Clean Address database. The rare exception may also be made if a person insists on a variation. Clean Address does not look at on campus addresses CM.

Punctuation will not be used in addresses.

2.B Address Type

The Banner System standardized list of address types is based on address purpose.

- MA is the primary address type for persons.
- BU is the primary address type for Non-Persons/Vendors.
- CM is the campus address.

Below is the Address Type Validation Table (STVATYP).

Code	Description	Explanation
A2	Advancement Business Address 2	Secondary place where a person works if outside UL or a business' second place.
A3	Advancement Business Address 3	Third place where a person works if outside UL or a business' third address.
AB	Advancement Business Address 1	Primary place where a person works if outside UL or a business' first mailing address.
AM	Advancement Mailing Address	Address that exists whether it is physical or mailing address. Used for individuals.
AP	Advancement Physical Address	Physical address if different than AM address. Used for individuals.
BI	Billing	Maintained by Bursar and/or Administrative Services. Created if the billing address is different from Home. Use to mail invoices and statements.
BU	Business	Maintained by Bursar, Student, and/or Advancement . The address where a person works off campus.
B2	Alternate Business	Alternate Business Address
CM	Campus	Maintained by Human Resources. The office location of an employee. <i>Official format is required as to which address lines contain building, room and mailing location while maintaining the integrity of the Banner address format.</i>
CO	Corporate Address	Used in connection with the vendor record with PaymentWorks. Mainatined by Purchasing.
EN	Emergency Notification	Self-Maintained.
GB	Grant Billing Address	
GC	Grant Contract Address	
IN	International – Out of Country	Maintained by Student.
IP	International – US Physical	Maintained by Student.

Code	Description	Explanation
MA	Mailing	For Person: Maintained by Student and/or Advancement unless address is for an employee, which is maintained by Human Resources. For Non-Person: Maintained by Finance.
**PA	Parent – Primary	System required. Maintained by Student. <i>The address appears only on the student record.</i>
PR	Permanent	For Person: Maintained by Student and/or Advancement. For Non-Person: Maintained by Finance.
RE	Remit to Address	Maintained by Administrative Services.
RH	Residence Hall	
SE	Seasonal	Maintained by Advancement. Stores seasonal (recurring) addresses for people.
VM	Vendor Mailing	Maintained by Purchasing.
XX	Reserved for TGRFEED only	Required reserved code for TGRFEED.
ZZ	Test Score Tape Loads	Maintained by Admissions.

2.C. From/To Dates

When adding a subsequent address of the same address type, the prior address should be end dated, the inactive box checked, and the new address added.

2.D Street Standards

All information is to be entered using upper and lower case letters.

The first address line is always required. Do NOT leave blank lines between street lines.

Hyphens and slashes may be used when needed for clarity or designated fractions.

No symbols may be used unless included on legal documentation.

‘In Care of’ should be entered as ‘c/o’. Do NOT use the % sign or spell out ‘in care of’.

2.E. Address Source

Code	Description	Explanation
ADM	Admission App Load	
ALFD	Alumni Finder	Specific address source using Alumni SSN for match
ALWB	Alumni Website	Self Service for A&F/iModules
ATHR	Athletic Research	Athletics ticket or website
CA	Correct Address	Addresses returned by Correct Address from Millennium - will not be used after Banner Conversion
CHCK	Check/CC	Check or CC receipt
CLA	Clean Address	Addresses returned by Clean Address

DO	Development Officer	Information from Development Officer/contact report
ELC	Electronic Load	
EM	Email Notification/ Email from constituent	
EVNT	Event	Information collected from an Event (Alumni or Athletic)
FIN	Finance Vendor	
ISIR	FASFA ISIR Load	
LET	Notified by Letter	
POST	Post Office Notification/ Post Office Returned Mail	
REL	Reported by relative/friend	Phone Call or correspondence from relative or friend
RET	Returned. No forwarding address.	
SELF	Self-Reported	Phone Call or correspondence
TPV	Third Party Vendor	Look ups on Third Party web/sites
WB	Wilson Bennett	Addresses found through Wilson Bennett Phone-a-thon
WE	Wealth Engine	Addresses specifically form Wealth Engine
WEB	Web Application/Web	

3. Telephone Information

3.A. General

When adding a subsequent telephone number of the same type, the prior telephone number should be end dated, marked inactive, and the new telephone added.

3.B. Telephone Type (STVTELE)

Code	Description	Address Type	Explanation
A2	Advancement Alternate Business	A2	Secondary phone for a person's business, if outside UL.
AB	Advancement Business	AB	Primary phone for a person's business, if outside UL.
AC	Advancement Cell	AM	Cell number for individuals.
AH	Advancement Home	AM	Home number of individuals.
AM	Advancement Mail/Home		
BI	Billing	BI	Maintained by Bursar and/or Administrative Services. Created if the billing number is different from Permanent.
BU	Business	BU	Maintained by Bursar, Student, and/or Advancement . The phone number/address where a person works off campus. This phone

Code	Description	Address Type	Explanation
			number/address is attached to a student, and is not the address of a vendor or corporate entity.
B2	Alternate Business	B2	Alternate Business
CE	Phone Admissions		
CEL	Cellular Phone	CEL	Maintained by all offices
CM	Campus	CM	Maintained by Student, Administrative Services, and/or Human Resources.
DRCT	Directory Phone	CM	Maintained by Human Resources.
EM	Emergency – In case of emergency	EM	Self-Maintained.
ENL1	Emergency Notification Landline 1	ENL1	Self-Maintained.
ENL2	Emergency Notification Landline 2	ENL2	Self-Maintained.

6. Inventory of University Integrated Systems – Data Connected

Generally, an integration involves the movement of data between various systems to support functionality and/or provide a unified view. Ellucian Banner ERP is the primary system of record for University business processes.

Requests for integrations are made by submitting a request form on the IT Service Desk website at <https://servicedesk.louisiana.edu/integrationrequest>.

The Inventory of University Systems (data-connected/integrated) as of April 2024 is posted on the [Data Governance and Standards Sharepoint site](#).
